

Architecture in images, form and motion.

A studio of two architects from
Warsaw and Łódź. Images and films
of architecture for design teams,
competitions and developers.

Who we are.

plankton.group is a studio of two architects, based in Warsaw and Łódź. We make images and films of architecture and work alongside design teams, mostly on competitions, and with developers bringing projects to market, for clients across Europe, the United States and Asia.

Competitions

We join competition teams as designers, not only as visualisers. We help develop the concept, test massing and materials, choose the key views and lay out the boards, right up to the deadline.

Images

Exteriors, interiors and aerial views of buildings that do not exist yet. We work like photographers: light, weather, season and the people in the frame are chosen to tell what the project is about.

Animation

Short films for competitions, presentations and sales: camera paths, sequences and edited films with sound. One of us comes from film, and it shows in the pacing and framing.

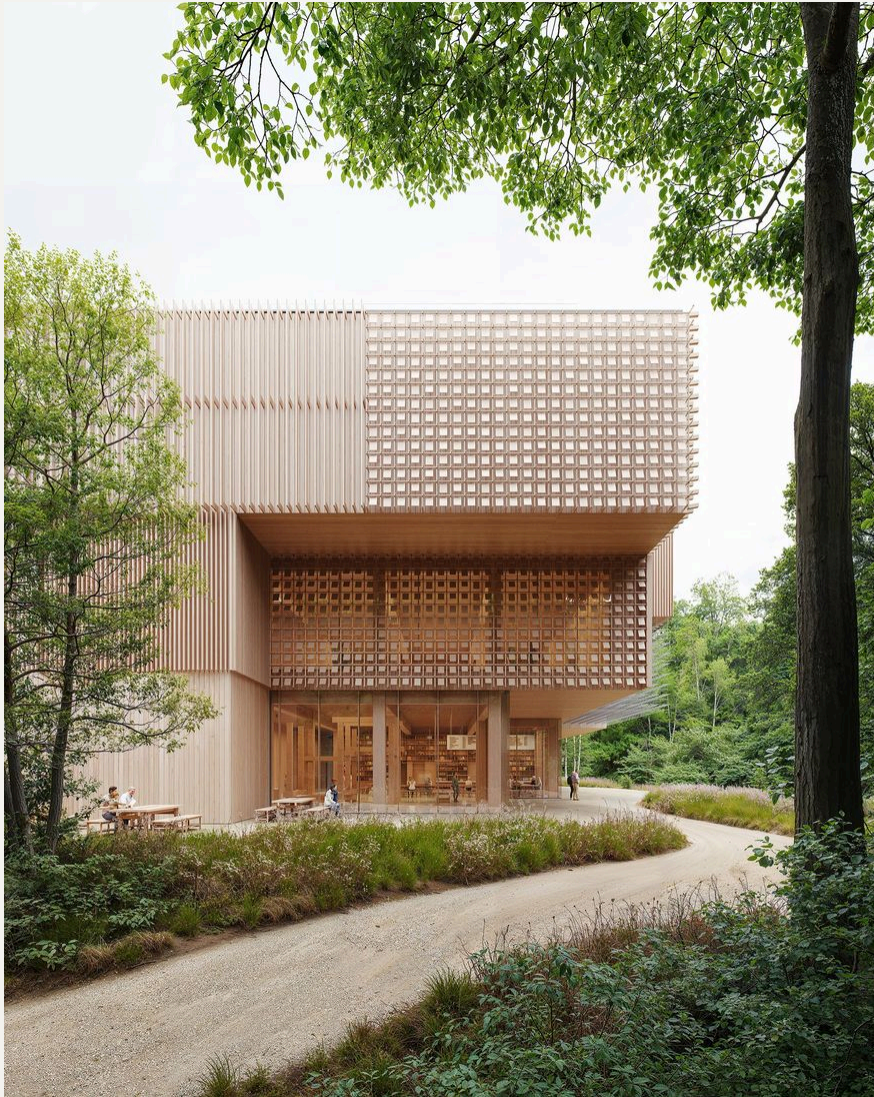

For developers

Images and films that sell: from visuals for the project website and hoardings, through show-flat interiors, to a launch film. A consistent series that keeps the character of the design, delivered to the timeline of the campaign.

Contemporary Theatre in Szczecin

Architects first.

We are both architects. Our own work ranges from houses and pavilions to studies of form and material. In competitions we join the team from the first sketch to the final board, so the images grow with the design, not after it.

Concept

Ideas, options, design decisions.

Massing and form

Studies of massing, material and light.

Views and boards

Key views, diagrams, competition boards.

In motion.

Films about architecture, and sometimes beyond it: camera paths, sequences and fully edited films with sound, for competitions and presentations. Each one opens on Vimeo.

Let's talk.

Write or call about a design, a competition or an upcoming sales launch. It works best when we can join early.
